

## Discover Best Practices - Review Your Architecture - Resolve Risks - Save Money

With how quickly and constantly your AWS environment changes, are you sure you're using the best, most up-to-date, and efficient AWS tools and services available? Are you certain your architecture will move you into the future and scale to support your critical business priorities? Is your cloud foundation cost-effective, secure, and resilient? You may not have these answers, but 1Strategy can help you find them and make sure you have the tools to achieve your objectives.

Based on years of experience across hundreds of architectures, 1Strategy experts help you determine how the **AWS Well-Architected Framework** relates to your primary business goals and context. By relying on our extensive experience with design principles and architectural best practices, we conduct an **AWS Well-Architected Review** to identify issues and potential problems, then we give you tools and expertise to resolve them. In addition to getting a Review, you get 40 hours of consulting to focus on elements identified in the Review.

### Key goals of a Well-Architected Review

- Mitigate risks
- Learn best practices
- Enable a focus on value adding features
- Build a backlog of architectural improvements
- Influence future architectures

### The Five Pillars of the Well-Architected Review

- Operational Excellence
- Security
- Cost Optimization
- Reliability
- Performance Efficiency

### Well-Architected PLUS!

In addition, 1Strategy has developed the Well-Architected PLUS! offering—the Well-Architected Review, plus discounted ad-hoc consulting hours (80 or 120 hours). Through the Well-Architected PLUS! you still receive the Well-Architected Review and 40 hours of consulting, but any additional hours are paid for by you and can only be elected until the remediation process begins. Additional hours of consulting can be purchased after the remediation process is complete but will not be offered at the same low rate.
